<b>RFS REQUIRING INSPECTION</b>																																			

	<b>1. Across all three categories of the 100 HMO's inspected, 10% had a category 1 hazard, more in the unlicensed than the licensed.</b>												
	<b>2. Of the 138 'issues' identified overall</b>												
	<b>65 were in the 45 non-licensable properties (average 1.5 per property) - included 5 Cat 1 Hazards or 11%</b>												
	<b>25 were in the 15 properties about to be subject to 'extended licensing' (average 1.65 per property) - -included 1 Cat 1 hazard or 7%</b>												
	<b>50 were in the 40 currently licensed larger HMO's (average 1.25 per property) - included 4 Cat 1 hazards - 8%</b>												
	<b>So problems are rather worse in the non-licensed properties</b>
