1. Summary

- 1.1 This report sets out the proposed recharges to Council housing tenants for the provision of communal heating, lighting and water supply during 2015/16.

2. Recommendation

- 2.1 To recommend to Council to agree the revised recharges for Council tenants relating to heating, lighting, water and miscellaneous charges for the rent year commencing 6th April 2015, as set out in Appendix 1 & Appendix 2.

3. Reasons for the Recommendation

- 3.1 Recharges are levied to recover costs of electricity, gas and water supply usage to individual properties within one of the sheltered and the 5 very sheltered housing schemes, which are provided as part of communal heating and water supplies. The costs of maintaining communal laundry facilities are also recharged at those sites benefitting from these facilities under the heading of miscellaneous charges.
- 3.2 The charges necessary to fully recover costs are calculated annually from average consumption over the past three years, updated for current costs and adjusted for one third of any over-recover or under-recovery in previous years.
- 3.3 In February 2013 the increase required to meet projected Heating & Lighting costs was felt unaffordable for tenants, so it was agreed to implement a lower increase and aim to fully recover costs within 5 year. Due to environmental measures taken, credits received and significant reduction in inflation on electricity and gas costs it is possible to set the majority of 2015/16 charges at the level that will fully meet costs with a modest increase in charges.
- 3.4 Where the increase to fully recover costs is above 95p per week the recommended 2015/16 increase has instead been set as 95p to ensure the increase is affordable for affected tenants and continue to move towards full recovery over future years.

4. Policy Framework

4.1 Policy Framework

- 4.1.1 The Heating, Lighting and Water Charges Report forms part of the Budgetary Framework, which is the resource strategy for implementing Fit for the Future.
- 4.1.2 Until 2013/14, it was the policy of this council to set recharges to tenants for the electricity, gas and water supplied to certain properties at the level that will fully recover these costs without 'rent pooling', that is without subsidising from other HRA income.
- 4.1.3 As described in paragraph 3.3, from 2013/14 when increases were felt unaffordable lower charges have been set to mitigate the immediate cost to tenants, recovering these costs gradually over subsequent years.

4.2 Fit for the Future

A key element of Fit for the Future is ensuring that the Council achieves the required savings to enable it to set a balanced budget whilst maintaining service provision. The Housing Revenue Account is subject to the same regime to ensure efficiency within the service.

5. Budgetary Framework

- 5.1 Recharges to tenants for the provision of communal heating, lighting and water form part of the Housing Revenue Account (HRA), which is a key component of the Council's budgetary framework.
- 5.2 If charges are set so as not to fully recover costs, this will present an additional cost to all housing tenants by way of the rent they are charged, unless costs are recouped in future years.

6. Risks

- 6.1 It would be impossible to predict fuel and water costs over the next year completely accurately. Therefore the charges tenants pay in a year will either over-recover or under-recover the costs.
- 6.2 This is mitigated by adjusting charges for one third of any over-recover or under-recovery in previous years. This ensures that over time what tenants pay will meet the costs of heating, water and lighting.

7. Alternative Options Considered

- 7.1 If any proposed charges are thought to be unaffordable for tenants, charges could be set at any level between no increase and the proposed charges, with the understanding that this means that the shortfall will either be funded from the rents of all tenants, the majority of whom will also be paying their own electricity and gas costs directly, or recovered from charges in future years when some flats may be occupied by new tenants who have not benefited from the reduced charges.
- 7.2 For those Heating/Lighting charges which have been set below the level necessary to recover the full cost, a higher charge could be set to better reflect the costs. This may make the increase unaffordable for some tenants, although the difference is not enormous – at most an additional £0.60 per week, £31.20 per year.
- 7.3 Charges could be set above the real costs of recovery. This would mean tenants of these schemes would have no choice but to pay above the real cost of these utilities, as the communal nature of these services means they cannot choose their own energy suppliers. This would not be fair.

8. Background

- 8.1 Costs for electricity, gas, water and laundry facilities provided at some housing schemes are recovered as a weekly charge.
- 8.2 These utility charges are not eligible for Housing Benefit.

- 8.3 Tenants are notified of these charges at the same time as the annual rent increase.
- 8.4 The gas and electricity used to deliver communal heating and lighting is supplied under the provisions of the Council's energy supply contracts.
- 8.5 Photovoltaic cells (solar panels) were installed on James Court, Tannery Court and Yeomanry Court in April 2012. The electricity generated reduces consumption from the national grid.
- 8.6 A biomass heating system has been installed in Tannery Court. In addition to the environmental benefits of using a more sustainable fuel, the capital cost of installation will be partly repaid over time by the Government's Renewable Heat Incentive scheme. Proposed charges are based on historical costs, but 2016/17 charges will be based on data from the first year of operation of the new system.
