ZONE 3: Less important area for birds nesting. Ecologist to review

ZONE 2 MOSTLY ALREADY FENCED

ZONE 1 ALREADY FENCED

## Existing Permanently Fenced Areas, Keep fencing in place:

### **Reasons:**

- extremely boggy underfoot
- the Snipe hide in there during winter
- many birds breed in the reed bed
- the pool is deep and a danger to the general public.

## **Seasonally Protected Areas:**

### **Reasons:**

- reduce disturbance to ground nesting birds
- increase wildlife diversity

# Proposed Seasonal Barrier.
