etrofitting must take place of all public buildings and council owned housing. nergy generation, efficiency and conservation plans must be in place with
nergy generation, efficiency and conservation plans must be in place with
nergy generation, efficiency and conservation plans must be in place with
neasurable targets.
ocal schools and other public service premises (e.g. council offices, police
ations) should have targets to establish a zero waste approach
etrofitting of private housing. A team of independent and experienced
pordinators should be in place to cover all housing to give unbiased
iformation and guidance of how to holistically address energy use and
eneration in people's houses. They will visit, assess and advise and explain the
roviders available. Investigate and put in place specific measures to ensure that flats are
ffectively included in all recycling and food waste initiatives and given access
community composting options.
ivestigate ways to reduce the environmental impact of commuting e.g.
ncouraging people to work from home, use public transport, provide more
ocal housing for those who work in the area
/hen rolling out the 2022 plans for waste and recycling, make sure that there
a good awareness campaign on recycling and other waste options (e.g. food
vaste) BEFORE making black/grey bin collection every three weeks
