

Executive item 9 Addendum - "A new bridge over the River Avon at St Nicholas Park, Warwick and improvements to the Myton Fields car park"

The Portfolio Holders responsible for the aforementioned report have asked officers to bring to Members' attention the following points when they are considering the report:

That should a new bridge prove not feasible, the case to improve the car parking area will still stand on its own terms as it could:

- Address the potential car parking shortfall at St Nicholas Park should the new leisure facilities prove even more successful than anticipated;
- Alleviate some of the early morning traffic issues associated with the schools on Myton Road;
- Provide an increase in overall car parking capacity for the town of Warwick;
- Inform the emerging car parking strategy for Warwick.
