

Please can this address list for the new apartments above Robbins Well/ Robbins Cellar be circulated to the panel, applicant and other attendees as I intend to refer to it at the hearing when asking questions of the applicant. It will help the panel consider how the access arrangements for the cellar bar from Victoria Terrace and Victoria colonnade would impact on occupants of the flats above, in terms of noise of persons entering/exiting the premises in the small hours and also potential for conflict between persons gathered outside the premises on the colonnade (riverside) , queuing, smoking and residents who access their flats by walking along the colonnade .

The list has been provided to Environmental Health by Warwick District Council Chief Executives Department who liaise with the POST OFFICE on the proper addressing of new developments.

Kind Regards
